Dr. Helen Makela
Institutum Sero-Bacteriologicum
Universitatis
Helsinki, Finland

Dear Helen:

I hope you will be pleased to hear that I have forwarded your S. abony Hfr paper to Genetics, with only a few insignificant corrections. (Forward means bring over to Dr. Perkins in the Biology Department, as he is now the editor). I asked Dr. Perkins to deal with you directly in any further correspondence on the paper, though of course I will be glad to answer any questions. We will place a separate reprint order for our departmental requirements.

It is a very well presented paper - I wish the students here generally wrote as precisely.

Life is too busy -- and apologies again for this delay-- but quite exciting, as you know from Gen.

Esther and I are just about the leave for a CIBA Foundation meeting in London (Nov. 26-30), then a week with Cavalli in Milan before a hasty return.

As ever,

Joshua Lederberg
Professor of Genetics
